We have up for sale a very rare 2008 Radical SR5 Endurosport race car (SR500015). The SR5 was Radicals answer for those who preferred a car engine instead of a motorcycle powered race car as they were noted for. The SR5 is a very rare find with only 24 produced worldwide. The SR5 sports a Honda K20 4 cyl sports car engine mated to a Hewland FTR 6 speed transaxle with paddleshift and auto blipper. This particular SR5 has the Radical/Powertec tuned engine option adding 50 more hp for a total of 287 BHP. Engine still has the original seal on engine as it left the factory. The SR5 may have been Radicals best model but did not sell well as it was very expensive and priced too close to the SR8 model. This is a 1 owner highly optioned car that spent its life at a country club race track where the owner barely used the car at all. It has a total of a 15-20 hrs since new and was used for track days only, NO RACING. The car was purchased this spring (after being stored a number of years) by the former east coast Radical distributor where it just underwent a complete 70 hr teardown/ full race preparation. It is in excellent operating condition in all respects and virtually as

new race car. NO accidents, damage, stories whatsoever. see details below:

Terms: \$1,000.00 deposit via Paypal due at end of listing, Balance in bank wire transfer (cleared funds within 3 days) or Cash prior to pickup.
