Description

This car checks ALL the boxes. It is an extensively updated early model car that has never been cut up or modified from legal Radical Cup Specs. It is without a doubt one of the fastest Early Model Cars on the planet....faster than many RS's and even a RSX or two. I take excellent care of everything I own, my cars want for nothing. It is for sale due to lack of time to use it. I have beat up on many newer Radicals with this car and will be very unhappy to see it go.....work has completely taken over my life.

- 2004 Left Hand Drive Chassis (#110) with approx 180 hours total Never crashed
- Factory Sealed Powertec K8 1340 Installed Brand New by Spring Mountain
