

127 Description from Apexspeed

[FS] Titled/Tagged/Street Legal Radical SR3 for sale

Hello Apex friends,

Looking to sell my Radical SR3. I've taken this car through the process of getting it street legal in Alabama. It's currently titled (clear Alabama state title) and tagged with the chassis number that's on the car. Insurance currently through Statefarm at \$55,000 for \$40/month

Happy to answer any questions here or through PM (preferred so I can keep track)

Radical SR3 chassis #SR300127 with SR8 front end, high down force package, extra cooling package, and adjustable coil overs.

Currently PAINTED red and a 1400cc motor built by Jeff Crago in Southern California (has less than 15 hours on it - running 93 octane) and a sequential manual gear box. Only 1 hour of track-day lite use, the rest has been street use going no where near redline.

Hoosiers mounted on one piece Radical wheels have 2 them. Second set of new R888s with the Radical lightweight two piece wheels included. Fresh oil change, brake lines flushed and bled, Cooling system flushed and burped, and a new 24 volt starting system.

Asking \$49,000 obo. I want to see it go to a good home and driven regularly!

Totally separate side-note, as a DD, looking for a Tesla P85D or P90D. I have a P85 and '09 GTR that I would be interesting in trading any combination of those + cash.

The only reason I am selling is to get an SR8 V8 and convert it.

Thanks!
