## **Description**

---

This Radical had a delivery date of 12/2009 and the car has a total of 56 hours in use. Unfortunately I have not been using the car as I am racing on the dirt.

This car has the following upgrades over a stock SR3

1. 1585cc Powertet Suzuki 260BHP
2. 98DB silencer
3. Lightweight Carbon composite bodywork
4. Carbon composite high downforce bi plane rear wing
5. Carbon composite high downforce front dive planes
6. High downforce rear diffuser
7. 280mm x 25mm front floating disc brake upgrade
8. 280mm x 25mm rear floating disc brake upgrade
9. Triple adjustable bespoke mono tube shock absorbers

I also have the following extras that go with the car

- \* spare wheels with brand new Michelin tires
- \* Spare starter
- \* Spare wheel lug nuts
- \* Spare brake rotors
- \* Spare new brake pads
- \* Race Ramps for loading car
- \* Front end Nose Jack

This car is an absolute blast to drive and will put some very expensive exotic cars to shame on track days. The car is very easy to drive fast as its so light and has so much downforce. Price is firm.
