NOTE: The car has had a full pre delivery inspection by certified Radical technicians. ALL fluids have been changed including engine oil, gearcase lubricant and brake fluid. Start up procedures have been performed including the installation of new 24V batteries and the car is running . A short break in period is recommended by the factory , and new car run in procedures should be followed as per the manual.

**** There will be a slight difference in the engine hours due to start up and initial systems check procedures.*
