Description

Radical SR3 RS chassis #547, white with orange/gray highlights, RPE 210hp engine, 6-speed sequential dog box transmission. At 1250 lbs, the Radical SR3 provides 6 lbs/hp with incredible handling and braking characteristics. It just received servicing and is ready for the track. This race car comes with: - Pneumatic paddle-activated gear shift with auto- blipper - High downforce front and rear aero components - Dry sump system - Fully integrated LIFE ECU - Extra set of wheels and tires - Upgraded 280mm rotors and brakes - Forward-facing stay head protectors - Electrically-activated Zero 360 Fire extinguisher system - Certified roll cage and 6- point harnesses for driver and passenger - Dual foot controls allow an instructor to help control the car. These controls can easily be removed - LeMans carbon- composite rear view mirrors - Fresh oil and transmission fluids - Brand new spark plugs and battery Chassis 547 comes to the US direct from the UK and was used for corporate track days at Castle Combe. Its right-hand drive driver position means that the car will counter-weight better than left- hand driver version. It is also unique in that it was also registered for street use in the UK. Buyer will receive the vintage UK license plate with car. Please keep in mind, this is still a purpose-built race car. It is **strictly** for track use and cannot be registered for use on the road.

History

Car was built at radical in the UK in 2012 and has spent the last five years being used occasionally for simple corporate track days at Castle Combe. it has been in storage for the last

year before being shipped out to the US to enter the market here. It was routinely serviced at 360 Racing in the UK and comes to the US, ready for the track.
