Description

This is serial 0012 which was among the first ones imported to the US. It is right hand drive but I understand this is easily changed to left hand. I found that I preferred it after only a few laps. It was originally a 1300 but I had Craigo Racing build it as a 1400 with lightened and balanced crank, Carillo rods, ported heads, and heavier valve springs. The engine was dry sumped from the factory and has transmission and diff coolers. The car is set up with twin seats but comes with a single seat which can be installed. It has a G2X data logger along with the Radical dash. It has a fire system installed and has Simpson harnesses. I have owned the car for 6 years and have used it sparingly and not at all for the last year. It comes with fresh paint, an extra partial set of wheels(one damaged), spare splitter , spare axles and some other spares. Advancing age dictates that I need to sell it.

Performance Data

- **Weight:** 1100 lbs

Engine

- **Engine Builder:** Craigo Racing
- **Manufacturer:** Suzuki
- **Displacement:** 1400cc

- **Horsepower:** 225
- **Induction:** Weber 40 DCOE carbs
- **Heads:** Suzuki ported and polished
