\$239,900

## Vehicle Description

Radical RXC Turbo 500R The best of British motorsport engineering twinned with exclusive Italian design! UK extreme road and track car manufacturer Radical Sportscars releases its most powerful and highly-specified car yet at the 2016 Geneva International Motor Show, with the launch of the RXC Turbo 500R. For the first time the RXC coup features dramatic lightweight carbon fibre bodywork, enveloping a new high-specification, twin-intercooled variant of the acclaimed Ford EcoBoost V6 engine. This latest-generation powertrain develops over 600bhp and 465lbft for genuine hypercar-rivalling performance - but with purchase and operating costs far below the opposition. The new carbon bodywork process - first showcased on the RXC Spyder stablemate just a few weeks ago - saves 50kg improving the staggering power-to-weight ratio to over 530bhp/tonne. The EcoBoost now features forged pistons, hand-finished gas flowed cylinder heads and exhaust headers and a revised engine management system for power delivery that is both brutal and progressive. Bigger 360mm front and 330mm rear fully-floating disc brakes linked to a new Bosch Motorsport ABS braking system result in class-leading stopping ability - twinned with the RXC's legendary mechanical grip and advanced LMP aerodynamics, the RXC Turbo 500R is Radical's fastest-ever track coupe. The RXC Turbo 500R also features numerous unique styling touches from Aznom Automotive, a progressive Milan-based automotive styling house. Aznom Design Studio was founded in 2006 with the aim of offering a complete automotive tailoring service that draws on technologies from different fields to create unique products. The interior of the RXC Turbo 500R by Aznom is designed to reflect the pure racing roots of the standard car whilst

bringing it even closer to a luxurious GT car. Aznom Automotive have designed the following unique features for this special edition RXC Turbo 500R, limited to just 21 units worldwide: > Special carbon fibre-framed, Technogel racing seats with adjustable inserts in carbon fibre weave technical fabric and contrast stitching. The cushions are available with different thickness and density to adapt to the owner, using a special gel developed for medical applications > Alcantara-covered dashboard with contrast stitching > Leather door panel inserts and detailing with contrast stitching > Special edition vinyl graphic exterior pack > Individually-numbered RXC Turbo 500R cockpit plaque Bespoke Aznom luggage collection To accompany each car Aznom Design have also created a bespoke luggage set in leather and carbon weave technical fabric, reflecting the unique styling and design touches of the RXC Turbo 500R. The collection comprises of the following items, ideal for the trackday enthusiast and gentleman racer. > Racing helmet and FHR bag > Boston holdall > Driving suit bag > Document wallet Advanced driving tuition at the Nordschleife The RXC Turbo R ownership experience doesn't stop there. The 21 owners will also receive free one-to-one advanced driving tuition at the famed Nurburgring Nordschleife, with the assistance of Radical's Works Team instructors and development staff. As current holders of the Nordschleife production car lap record with the SR8 LM, Radical see no better environment to experience and enjoy the RXC Turbo 500R's performance and handling capability than this 20.8km (12.9 mile) motorsport mecca in the High Eifel. Technical Specification Engine > Ford EcoBoost V6 Ti-VCT, 24-valve 3500cc engine, DOHC twin independent variable camshaft timing, sequential direct injection, plenum secondary injection and drive-by-wire throttle, twin Garrett GT28RS turbochargers and intercoolers > Power: 600bhp @ 6700rpm > Torque: 465lbft @ 4200-6200rpm Transmission > Bespoke 6-speed transverse straight-cut Quaife gearbox with paddle shift and autoblip Chassis > High-tensile strength CDS carbon tubular steel spaceframe with FIA specification crash boxes front and rear Body > Aerodynamic multi-piece carbon fibre and GRP composite bodywork, front and rear diffusers, carbon bi-plane rear wing, gullwing doors with gas rams, full LED race lighting system > Electrically adjustable and heated wing mirrors > Air jacks Interior > Multi-function fully adjustable steering wheel, EPAS multi point adjustable power steering, heated front screen, single windscreen wiper and adjustable pedal box Fuel system > 100-litre Aluminium fuel tank > Twin refuelling caps Electronics > AIM MXS multifunction LCD dash with digital rev counter and display integral datalogger, LED gear shift lights > Multi-point adjustable traction control system, launch control > Electric Lifeline fire extinguisher system Suspension > Front and rear double wishbone pushrod suspension > Bespoke inboard 4-way adjustable Intrax dampers Brakes > Fully-floating steel disc brakes with six-pot calipers front 360mm, rear 330mm > Bosch M4 race ABS system with multi-point adjustment > Front-rear brake bias adjuster Wheels > Centre-lock forged alloy wheels, front: 17x9.5, rear: 18x11 Dimensions > L 4300mm W 1960mm H 1127mm The RXC Turbo 500R is available to order now.
