

January 2020

I bought chassis 417 in September of 2020.

The previous owner bought the Go Daddy themed car from a private owner at Spring Mountain. He stripped off the Go Daddy theme. The car was not wrapped, but was painted green and black. He owned the car for less than a year.

Not sure when the car was upgraded to a 1500cc FI motor(K7), but that is what was in the car when I bought it. The previous owner says that the 1500 was in the car when he bought it, as he did not change it. I checked with Spring Mountain and they have a record of the current motor.

When I bought it, the car came with triple adjustable shocks, headlights, 280mm front brakes and stock rear, paddle shift. 3 sets of Gen 2 wheels(1 – Black, 1-Graphite, 1- Silver) and one set of Gen 1 wheels. 2 GDU gear sets, 1 installed and 1 alternate set. Spare clutch, carbon fiber side mirrors.

Since I have owned the car, I have I upgraded or installed the following.

- *Upgraded Aim MXL Strada to a Pista.
- *New 6 point harnesses in both seats.
- *New fire bottle.
- *Fixed wiring to head lights and replaced bad bulbs.
- *Fixed some minor fiberglass issues.
- *Lined all fender wells with light weight rubber coating that seems to be significantly cutting down on rock damage.
- *Added rear view camera system.
- *Changed steering wheel.
- *Added Garmin Catalyst setup.
- *Replaced and rebuilt left side drive shaft.
- *New front and rear brake rotors and pads.
- *Installed air jack system.
- *Installed oil tank heater.
- *Installed mini windshield in front of driver.
- *Had the nose repainted and the whole car wrapped.
- *Working on adding brake pressure sensors.
- *Added Aim Sporty Cam.
- *New headrest pads/covers and roll bar covers and foam.
- *Added 24 Volt start setup.
- *Added powered My Laps transponder.
- *Replaced gear position sensor.
